## Parent Pick-Up Procedures

- Remind your child(ren) to pay attention to the display board in their classroom.
- Remind your child(ren) to actively monitor the car line for your car once they are outside.
- Form a double line upon entering the school parking lot (see diagram on back).
- A staff member will be in the lot checking your car tag # and entering it onto the display board.
- The loading zone is the length of the awning up to disabled parking. Staff will direct how far back students can load. They can **NEVER** load at or beyond the curve. Please fill the loading zone as far up to the front as possible. Do not stop in the middle of the zone because your child is right there. Your child is directed to follow your car up until it stops.
- For the safety of your children, the loading zone is directed by the staff. Once students are loaded, cars are directed by staff at the front to leave at one time. For student safety, only one side of the double line can leave at a time. Please do not pull out of one lane and go to the other. Please watch for crossing children at all times.
- Students are only allowed to load in the parent pick-up line; they may **NOT** load in the parking lot or on Chiquita Blvd due to safety reasons.
- If it is raining hard, please form a single line against the sidewalk. Students will only be loaded under the awning during heavy rain. Please be patient if there is lightning since we cannot always dismiss on time if there is lightning. Safety is our priority.
- We understand your time is important. By following the procedures and encouraging your child to pay attention to the line, we will be able to get you out ASAP.

Thank you,  
The Mariner Middle Safety Coordinators & Admin
